

Preventing Substance Use Before It Begins

Putnam County and surrounding areas have suffered from alarming rates of prescription drug and opioid use—and preventable overdoses— among young people in recent years.

As part of our mission to partner with the community, CoveCare Center offers **prevention education** in Putnam County schools. Students from elementary to high school receive evidence-based, age-appropriate lessons that help them develop the skills they need to live substance-free lives.

Through our **Community Education and Outreach initiative**, we raise awareness about the effects of substance use, and we inform the public about local resources and treatment options.

“They are really wonderful here. I am now more comfortable with confronting my feelings and working through them with CoveCare instead of pushing them down with substances or alcohol.”

Information and Enrollment

20th Anniversary

Your Partner in Recovery

“I can remember the moment that I realized I was not alone.”

Has alcohol or substance use become a problem?

Is it interfering with your relationships, or your performance at work or school?

Does it cause you to behave in ways that place you or others at risk?

When it's time to face the realities of an alcohol or substance use problem, our licensed program at CoveCare Center is here to help.

Our credentialed counselors and social workers provide compassionate, effective treatment that meets your specific needs. We'll be your partner in recovery.

A Partner to Family and Loved Ones

Family members and friends are also affected by substance use issues. At CoveCare Center, we offer counseling to help them help themselves... and learn how they can best support you.

Recovery Is Possible

We understand the struggles and challenges that alcohol and substance use can create. We also know that, with the right support, recovery is possible. We see it happen every day.

Our caring staff will help you identify your needs and goals, and work with you to create a customized recovery plan. You can choose from the following:

- **Individual and family counseling**, which provides an important foundation for successful recovery.
- **Groups**, including groups tailored for women, men, people with mental health conditions, and those who have received DWIs. Other groups focus on relapse prevention, medication management, health and wellness, and more.
- **Evaluations and Medications.** Our board-certified psychiatrists offer evaluations and will prescribe medication as needed, including treatment for opioid use.

“My counselors taught me positive coping skills and healthy ways to manage stress. They basically taught me to love myself again. Today my life is full of hope and grace. I can hold my head up high and be the woman I intended to be.”

Services at CoveCare Center and Beyond

Substance use problems often develop within the context of other issues, especially mental health conditions. As part of your recovery plan, you'll have access to resources throughout CoveCare Center, including:

- **Mental Health Services**, if you need additional counseling.
- **Personalized Recovery-Oriented Services for people engaged in rehabilitation (PROS)**, which offers comprehensive support for people with serious mental health conditions.
- **Care Management Services**, which can help connect you to needed resources, benefits and housing.

Based on your needs and goals, we can also connect you with resources available through our many community partnerships.
